

LED MIRRORS

# HAMILTON

The HAMILTON mirror with LED lighting is a stylish and functional solution for a modern interior. Its main feature is the built-in LED backlighting, which is evenly distributed around the entire circumference of the mirror, creating the effect of soft, diffused light. The HAMILTON mirror not only provides excellent visibility but also creates an elegant accent in the room, perfectly fitting into modern minimalist interiors.

Its main feature is the ability to change the color temperature of the backlight from warm to cold white, allowing you to adjust the lighting from soft, cozy light (2700K) to bright, cold light (6500K).
