

A photograph of an underground parking garage. The ceiling is a white grid with numerous LED T8 G13 tubes installed. The floor is a smooth, light gray concrete. On the left, there is a concrete wall with a metal railing. In the background, there are several white concrete pillars and a red fire hose reel mounted on a wall. The lighting is bright and even, highlighting the clean, modern design of the space.

LED T8 G13 TUBES

LED T8 G13 TUBE

HIGH LUMEN

TOP BRAND
LED CHIPS

The VISIONAL Basic Line T8 LED tube is designed to deliver dependable, energy-efficient lighting for everyday commercial, industrial, and residential applications. Offering a smart replacement for traditional fluorescent tubes, it combines simplicity, performance, and cost-effectiveness in one durable solution.

With its high-efficiency LED technology, the Basic Line provides bright, flicker-free illumination with significantly lower energy consumption and a longer lifespan than conventional lighting. Available in multiple lengths it is ideal for use in offices, warehouses, garages, workshops, supermarkets, and public areas.

The tube features a shatter-resistant cover and instant start performance – no buzzing, no warm-up time. Easy to install in both new and retrofit T8 fixtures, it supports hassle-free upgrades for improved sustainability and reduced maintenance.

VISIONAL T8 Basic Line – a trusted choice for efficient, everyday lighting without compromise.

- T8 G13 • 4000K - neutral white • Ra > 80 • 220° • IP20 • AC220-240V
- SMD2835 • PF 0.9 • EEI: E • Lifespan up to 50 000h • 2 year warranty

EXTRA
HIGH LUMEN

The VISIONAL Professional Line T8 LED tube is engineered for high-demand applications where reliability, brightness, and long-term performance matter most. It offers a premium upgrade over standard fluorescent and basic LED tubes – delivering enhanced efficiency, superior light quality, and maximum durability.

Ideal for commercial, industrial, and high-traffic environments such as warehouses, production facilities, supermarkets, parking garages, and public buildings, the Professional Line ensures consistent, flicker-free illumination with high luminous efficacy and excellent color rendering (CRI).

Built with robust materials and shatter-resistant housing, it provides instant start, no flicker, and no buzzing, even in cold or humid conditions.

With a significantly longer lifespan and reduced maintenance costs, VISIONAL Professional Line is the smart solution for those who expect more from their lighting.

VISIONAL Professional Line – lighting you can trust, performance you can see.
